

Longevity & Wellbeing

Mushroom Coffee Superfood Blend (Salted Caramel Vanilla)

A Note from Our Founder

In today's crowded wellness space, knowing what to trust can be a challenge. I created More. Longevity & Wellbeing to offer clean, effective solutions—crafted with intention, rooted in science, and designed to support real, lasting change.

At More., we go beyond ingredients. Every formula is developed with bioavailability and synergy in mind—ensuring nutrients are delivered in forms your body can absorb, and work in harmony to support your health.

We take a systems-based approach, working with the body's natural intelligence to promote balance, resilience, and whole-body vitality.

No trends. No fillers. Just thoughtful formulations made to meet you where you are.

*Thank you for being here,
Pascale Rothman
Founder, More. Longevity & Wellbeing*

Evaluating the Science Behind Mushroom Coffee Superfood Blend (Salted Caramel Vanilla) by More Longevity & Wellbeing

More. Longevity & Wellbeing Mushroom Coffee Superfood Blend | Instant Coffee for Energy, Focus, Digestion, Immunity and Stress Support | 7 Functional Mushrooms Including Lion's Mane, Cordyceps and Turkey Tail | Ashwagandha, Panax Ginseng and Vitamins | Potent Extract-Based Formula | No Fillers | No Chemicals | Third-Party Tested | Made in the USA | Salted Caramel Vanilla Flavor

Mushroom Coffee Superfood Blend (Salted Caramel Vanilla) offered by More Longevity & Wellbeing presents a sophisticated formulation, integrating Adaptogens, Nootropics, essential Micronutrients and Prebiotic Fiber to target four interrelated domains of Human Function: Energy, Stress Response, Relaxation and Cognitive Focus. What distinguishes this product from conventional supplements is the synergistic Pharmacological Architecture - a blend grounded not in Isolated Symptom Relief but in Systems Biology.

How to Use

1. Scoop: Measure 1 scoop (12g) of the blend.
 2. Pour: Add 8 oz of hot water for a smooth salted caramel vanilla infusion..
 3. Stir & Awaken: Stir thoroughly until smooth. Relish the creamy caramel-vanilla flavor as you ignite your focus and vitality.
- For a latte-like experience, mix with your favorite milk or a splash of cream.

Green Tea

At the core of its Energy-Supporting mechanism lies Green Tea, a natural source of Caffeine accompanied by Theanine. Unlike synthetic Caffeine sources, this combination promotes wakefulness while mitigating one's jittery sensation, thanks to Theanine's modulation of Alpha Brain Waves / GABAergic activity. Additionally, Panax Ginseng - a well-characterized Adaptogen - enhances ATP production / mitigates Fatigue via AMPK pathway activation. Cordyceps and Chaga, both medicinal Fungi, further augment Mitochondrial Bioenergetics / Oxygen Utilization, supporting Physical Stamina/Cellular Metabolism.

B Vitamins

The inclusion of Methylated B Vitamins (B3, B6, B9, B12) in bioavailable forms reflects a deliberate choice for Neurological Optimization. Methylfolate and Methylcobalamin bypass common expressions in Folate Metabolism (MTHFR), ensuring effective Homocysteine Regulation and Neurotransmitter Synthesis - critical for Mental Clarity / Sustained Energy.

Ashwagandha

Addressing Stress Relaxation, this formula leverages Ashwagandha, a well- documented Adaptogen known for regulating Cortisol Levels through Hypothalamic- Pituitary-Adrenal (HPA) Axis Modulation. This effect is complemented by Reishi, which contains Triterpenes / Beta-Glucans known to reduce Systemic Inflammation and support Parasympathetic Tone. Magnesium acts as a natural Anxiolytic by enhancing GABA activity and antagonizing NMDA receptors. These pathways reduce Neural Excitotoxicity / promote Restorative Calm.

Lion's Mane mushroom

Cognitive Focus is sharpened through the use of Lion's Mane, a Nootropic mushroom shown in vitro clinical studies to stimulate Nerve Growth Factor (NGF) Synthesis. This Neurotrophic Support is pivotal for Synaptic Plasticity, Memory Consolidation and Neurogenesis. The addition of Zinc, essential for over 300 enzymatic processes including Neurotransmission, fortifies these Cognitive benefits, especially when delivered in a chelated form that avoids Gastrointestinal Irritation / poor absorption.

Chicory root & Chia Seeds

In terms of Gut-Brain Axis optimization, the inclusion of Inulin (Chicory root) / Chia Seeds introduces a Prebiotic matrix that feeds Gut Flora. A robust Microbiome is linked to Neurotransmitter Balance / Immune Resilience / Mood Regulation.

Most competitor products falter due to Reductionism / Ingredient Isolation. They might target Energy with high-dose Caffeine or Focus with synthetic Nootropics, but rarely do they offer a multi-dimensional system that considers Biochemical Individuality, Neuroendocrine Integration and Bioavailability Optimization. Many lack Adaptogens, omit Methylated B-vitamins, or ignore the Gut-Brain Axis altogether, resulting in unbalanced stimulation or limited efficacy.

Mushroom Coffee Superfood Blend (Salted Caramel Vanilla) stands apart due to its system-based approach, marrying ancient Botanical wisdom with contemporary Biochemical insight. The ingredient profile offered in this formula is a carefully designed Neuroadaptive Complex. For the consumer, the rationale to consider this blend is grounded in Holistic Efficacy: it promotes sustainable Energy without Overstimulation, modulates Stress without Sedation, fosters Relaxation while maintaining Alertness and supports Cognitive Clarity with Cellular-level nourishment.

In an era where Chronic Stress and Cognitive Fatigue are ubiquitous, a formula that simultaneously targets the HPA (Hypothalamic-Pituitary-Adrenal) Axis, Mitochondrial Function, Synaptic Plasticity and Gut-Brain communication is not just helpful it is essential.
